Consolidate data across your portfolio

Capture siloed data from on-premise (such as PMS, POS, GL, and labor) and off-premise databases (such as STR, GSS, and rate shopping). IntelliSight standardizes and cross matches your data across systems to create rich reports with fresh insights down to the transaction level.

Analyze performance in real-time

Customize reports and dashboards or take advantage of our pre-defined industry-standard reports to make analysis a breeze. Optimize your hotel's financial performance with real-time revenue analytics. See how different departments affect each other and improve profitability.

Maximize revenue with ease

Use rich, interactive data visualizations to achieve your total revenue management goals. Track and course correct on important KPIs like RevPAR, ADR, occupancy, and more. Identify upsell opportunities in F&B, room, event, and sales reports to improve profitability.

OTELIER | otelier.io

Automate your hotel data pipeline to save hours of manual work and improve data accuracy.

Otelier IntelliSight normalizes your data - replacing the quirks and logic of disparate systems with standard best practices and cross-matching your datasets to add more value and depth. Uncover powerful insights into your portfolio performance.

- Customize your dashboards and reports for the unique needs of your hotel mix.
- Easily identify opportunities and benchmark them across properties.
- Pinpoint pickup effortlessly with the industry's best pace reporting tools.
- Share revenue insights with your team securely using automated reports.
