

Adopt Hotelogix CRS

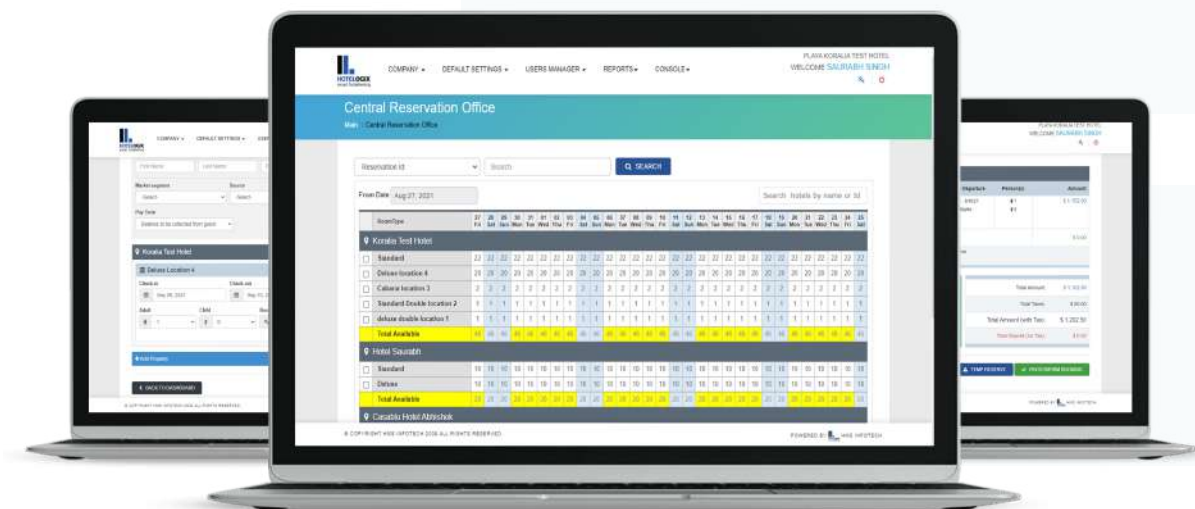

To manage your chain
hotel operations centrally

HOTELOGIX
smart hoteliering

Are you struggling to manage your chain hotels' rooms and rates across multiple distribution channels?

No worries, we have got you covered. Our **cloud-based Central Reservation System (CRS)** has everything you need to ensure better and smarter hotel operations.

HOTELOGIX
smart hoteliering

How CRS works?

Centralizes reservations, rates, and room availability data from the PMS

Updates all the distribution platforms - GDSs, OTAs, and your website with available inventory and rates instantly and in real-time

Ensures all bookings made across properties are captured in the PMS

Eliminates confusions and mistakes around the availability of rooms

Reduces double-booking and overbooking

Increases your hotel's visibility across online booking channels and regions

Enables you to sell more to increase occupancy rate and profitability

Reasons to choose Hotelogix CRS

- Go cloud
- Execute robust revenue strategies
- Centrally manage rate and availability
- Manage guests' preferences and requests better
- Free up your front desk task for other guest-facing activities
- Free up your front desk task for other guest-facing activities
- Increase your direct bookings, save more on distribution commission

Not convinced? Here are some more reasons

- Automatic updates
- 24/7 support with a dedicated account manager
- Scalable and becomes your partner in growth
- Zero license fee, no long-term commitment

The power of Hotelogix CRS

EFFICIENT MULTI-PROPERTY MANAGEMENT

Experience brand-level management from the group website and Central Reservation Office - everything from one central location and dashboard. Make informed decisions with real-time group MIS reports.

CENTRAL RESERVATION OFFICE

Instantly synchronize all the bookings with a single sign-on, preventing double-booking or overbooking.

ITINERARY BOOKING

Manage bookings for itineraries and accept bookings for multiple hotels/rooms type across different check-in dates

CENTRALIZED GUEST HISTORY

Manage bookings for itineraries and accept bookings for multiple hotels/rooms type across different check-in dates

ENHANCED OCCUPANCY AND REVPAR

Efficiently manage group-wide revenue. Introduce dynamic pricing and implement geo-targeted rate plans

CENTRAL RESERVATION API

Gain unparalleled integration capabilities with your technology stack, third-party solutions, and PMS. Connect your multiple properties using an open API.

CENTRALIZED AVAILABILITY GRID

Gain centralized availability for all your properties. Centrally manage TA/Corporate profiles for all your properties.

EASY QUOTATION

Block rooms and send quotations to guests with personalized terms & conditions and booking policies to offer personalization.

INSIGHTFUL DATA

Capture and maintain business-critical data like market segment, source, and guest type for better insights and analysis.

FLEXIBLE PAYMENT AND DEPOSIT OPTIONS

Empower your reservation agents to offer customized payment terms or enforce policy-driven deposits to manage bookings, cancellations, and no-shows easily.

INCREASED ROOM SALES

Roll out promotions/promo codes and discounts for special campaigns to increase room sales.
