4WiFi is a fully managed and scalable, cloud hosted network management platform that integrates with a large number of Property Management Systems and external integrations such as Online Payment Gateways.

The platform provides for authentication via a Captive Portal which is easily customised to match the marketing strategy of your property.

Key Features

- Our cloud-based portal provides instant access to all functionality.

- Easily customised Captive Portal templates.

- Security is at the forefront of the platform with industry leading best practice for data storage of personal private information (PPI).

- Add on features such as family-safe internet content filtering is available.

- Options for All Free, Part Free with Paid for extra or Paid only access are available.

- By integrating with your PMS, additional methods of differentiating and value-adding to guests are provided.

- Operating on class-leading Mikrotik hardware connected by secure VPN to AWS Cloud, a reliable and robust system is guaranteed.
