

WebSky Tech (WST) is a globally operating IT company, delivering advanced solutions for the travel and mobility industries. Founded in 2008 and headquartered in Barcelona, Spain, we focus on leveraging data to enhance operational efficiency, personalize customer experiences, optimize revenue, and automate services across various sectors.

Customer Data Platform

Our flagship product, Paximizer CDP, is designed specifically for the travel and transportation sectors. It provides centralized user data management and integrates seamlessly with other systems, delivering unique insights and optimization capabilities. This platform serves a variety of industries, including airlines, rail companies, online travel agencies, and tour operators.

In addition to Paximizer, we offer a range of services, utilizing our expertise in machine learning, big data, cloud infrastructure management, software development, and ensuring compliance with security standards. These services enable us to meet the diverse technological needs of our clients, with a strong emphasis on innovation and reliability.
