- Management of market segments
- Management of room types
- Integration with any PMS and Channel Manager
- Revenue Strategy Assistant
- trivago heatmap

Our solution is a web-based platform that collects data from different data sources and, through Artificial Intelligence, provides a set of tools and outputs, to support Hoteliers in detecting patterns and learning how to set a proper go-to-market strategy. Based on future predictions, users can apply dynamic pricing and take proper commercial actions to optimize their Hotel revenue.

Leaving micro analysis and manual data extraction behind, to allow Hoteliers keeping focus on Strategy
