

SynXis Central Reservation System

Seriously smart. Designed to scale.

For hoteliers, your CRS is the heart of your revenue generation. It's the control center that drives key decisions and the engine that powers growth. Aven Hospitality's SynXis Central Reservation System is the intelligent CRS that leading hotels rely on. Built for ambitious businesses, it helps you do more and make more. It pulls disparate streams of data into a single source of truth for your distribution strategies. Powerful automations keep your team agile but aligned. It empowers you to take decisive action in any market, with an API library of 100+ endpoints and continuous enhancements to keep you ahead of what's next.

"We needed a strategic partner that had the ability and knowledge to leverage travelers' shopping and booking preferences while offering greater international reach and found such a provider with Aven Hospitality."

Managing Director,
Quality Reservations
