Learn how much your staff are raking in

Identify Peak Tipping Periods

Enhance Customer Satisfaction

Reduced table turnover time

Improved efficiency

Intuitive and inviting menus

Split bills and provide flexibility to customers

Enhance Staff Satisfaction

Increased tips

Tools to provide insights on how to improve business

Feedback to improve quality of service

Keep property & guest data secure

Property and guest data is stored and processed safely, with automated processes designed to reduce the risk of fraud, theft or manual errors.

PCI DSS compliance

Servers and payment gateway provider are fully PCI DSS compliant.

Tokenization

Credit card details are replaced with an encrypted token so sensitive data is never seen or collected.

Safe and Easy

3DS optimized and PSD2 compliant so you can always be sure that card information is protected.
