

# The Hospitality Customer Data Platform

## Data Flow

# Hotelier Benefits

## Marketing

Focus marketing campaigns on most valuable guests, and trust every dollar of marketing spend to go to real, timely opportunities without the risk of spam or unsubscribes.

## Digital

Effortless upselling and enhance every stay with tailored offers based on past-stay data to recommend the right package based on historic guest preferences.

## Operations

Exceed expectations for every guest with predicted dining recommendations, proper guest recognition, and customized in-room preferences like lighting and temperature.

## IT

Two way integrations with PMS, CRS, F&B, Spa system data and more for easy centralization of data and monitoring of all integrations from one place.

“Ireckonu CDP enables our Guest360, syncing guest datasets in real time from many domains so we can know our guests’ history, preferences, and plans. This allows our colleagues and systems to better anticipate Guests’ needs and personalize offers and service.”

Todd Wood, Vice President, Global Applications & Transformation  
Mandarin Oriental Hotel Group

## CRM vs CDP

	CRM	CDP
<b>Guest Communication</b>   Send guests marketing and transactional emails	✓	✓
<b>Data Consolidation</b>   CDP supports two way communication	✓	✓
<b>Automatic de-duplication</b>   Accurate duplicate removal for one true guest profile	✗	✓
<b>RFM+ Guest Recognition</b>   Quick view of real guest value over time	✗	✓
<b>AI-Powered Segmentation</b>   Discover hidden segments with clustering	✗	✓
<b>Smart Churn Management</b>   Use AI/ML algorithms to spot and engage at-risk guests	✗	✓
<b>Next Best Offer</b>   Boost guest LTV by suggested offers based on behavioral data	✗	✓
<b>Secure Compliance</b>   Built in GDPR and CCPA compliance for secure data usage	✗	✓
