Hotel Quality Index (HQi) Our Superpower!

Understand the holistic perception of your hotel from the customer's point of view with our HQi. It's the only index in the hotel market measuring overall hotel quality, to understand competitive positioning and price elasticity.

AI Powered Algorithms

AI-powered automated dynamic and personalised revenue optimisation means that your hotel will capture value at every turn.

Hyper Segmentation

Bring flexibility and agility to your business with automated double segmentation by channel and market, to deploy multiple pricing models simultaneously.

Tour Operation Inventory Control

The only RMS that centralizes your decisions in one platform due is capable to intelligently optimize inventory from any segments.

Our platform gives you exceptional control and visualisation of your entire hotel operation through our integrations with the leading PMS, Channel Managers, Booking Tools, BI systems and more!
