AURI

SPA & WELLNESS MANAGEMENT SOFTWARE

Give your spa the tools to earn more.

One system for your hotel spa: guest booking, your team's day and your results. Built for your spa alone, under your brand.

- Guests book on their phone
- Therapist, room and equipment checked together
- See what earns

The results rest on you.

Empty treatment hours. Clashing bookings. Reports built by hand. Tools built for someone else leave the work with you.

You run the spa and know what earns.

Guests book themselves
Hotel guests scan the QR code in their room. Visitors book from your website.

One clear plan for the day
AURI offers a time only when the therapist, room and equipment are all free.

You see what earns
Revenue and utilisation per therapist, room and treatment, plus a monthly report.

Your brand
Your colours, your logo, your address.

We know the work.

You are responsible for the results. Your tools should carry their share of the work. Gina brings over a decade in luxury hospitality. Maciej leads the engineering. We show you the working system, not slides.

Three steps.

01
Request a demo.

02
See your tailored demo.

03
Go live.

Your own system and your own database. Nothing shared with other clients.

Setup from €30,000, one time · Support from €890 / month · No fees per booking, user or room

If your current software cannot support the way your spa works, talking to us is the right decision.
