GroupSync™ Housing

Know your guests in advance of their arrival and create additional upsell opportunities. GroupSync Housing simplifies room block and attendee management – keeping your guest information and room pickup data available when you need it.

No more rooming lists

Easily set up event-branded websites for guests to book their own rooms within a room block, while having visibility over all booking activity. With GroupSync Housing, you'll reduce errors and time spent managing rooming lists.

Upsell group guests

Offer group guests the ability to book shoulder nights, room upgrades or packages at the time of booking. You'll know your guests ahead of time and increase revenue opportunities while avoiding extra-night book-arounds.

Save time & effort

Grow group revenue, do more with less effort, and provide a more personalized customer experience for planners and guests. Setting up each booking website is easy – allowing guests to reserve rooms and make changes online.

With the right technology, hoteliers can easily add up to 25% to their bottom line without any additional effort.
