

We make you a better you

Unlocking human potential in revenue management

The user is the weakest link & yet the crucial part in the optimization cycle Optimization success = User capabilities = untapped potential

Major issue in revenue optimization

80+% of hotels do not use revenue systems

Conflicting approaches to price recommendations and **conflicting recommendations** across systems

Lack of data interpretation capabilities

Long, costly & fragmented software implementations

Different user = Different outcome

Less skilled staff have to do more complex tasks

Industry drainage due to war for talent

Lack of access to local talent leaves jobs empty or requires outsourcing

Lack of people who can deal and know all revenue generating systems

Data Overload

The traditional way of trying to solve it

Private & Confidential

What makes us different

We turn the biggest problem into a solution:

The user

But everyone understands data like this.

Everyone can be a talent

Not everyone will understand data presented like this

ALC: NO.

Elevator Pitch

We are expected to fill. Both rooms and ADR pace are ahead of trend. Our rates are higher than usual. Competitors are pricing higher than where they typically price themselves. This means they are seeing demand too. Positioning wise, we are sitting at the top end of the competitor set. Meaning higher than where we are normally positioned. This might impact our conversions and visibility on OTA's. All competitors are selling for the day.

"In a time where we are surrounded by data, it doesn't mean that we necessarily understand it or derive any meaning from it.
IVI is the only revenue analyst we trust to provide our teams with the transparency and insights no matter their skill level, in a language that is easy to understand, and IVI works 24/7.
We see IVI as a part of our strategy team"

We solve the hardest part. The part between data and taking a decision. The part where it all goes wrong: Making data understandable without bias

IVI alerts is an industry leading array of alerts that identifies when you are needed. Each and every time:

- → Revenue Anomalies alerts
- → Competitor movement alert
- → Daily Hotel pick up report
- → Group pick up reports

Our approach prevents risk: Benefits of our anomaly reporting

A 5* Hotel rates are typically at \$170.

Due to a system glitch between various systems (RMS / Channel Manager / PMS), a rate update resulted in **rates of \$17 being distributed** for two dates.

Those two days surged within 1 hr.

It took the system vendors 2hrs to realize something was wrong.

IVI alerted the user within minutes...

Pace against Prior Months.

in the current month of October 2023, as at 25 October, 770 rooms were rented at an average daily rate (ADR) of \$274.54, generating revenue of \$211,398. Th from previous months- from September's 630 rooms, August's 629 rooms and July's 522 rooms- each at varying ADR, thus resulting in differing revenues. The bookings, therefore, grew significantly over these last few months.

Variance to Start of the Month.

The variance in October compared to the 1st of October saw an increase of 78 rooms with an ADR decrease of 14, resulting in a revenue/variance of 20471.41 while more rooms were successfully sold, the ADR full, leading to only a slight uptick in total revenue. Fluctuations in the room and ADR variance show signs o strategy, but needs to be managed to improve revenue.

Pace against Some Time Last Year:

Contrasting the current performance (October 2023) with the same point in time last year (October 2022), we notice a considerable improvement in the pace or October 2022, only 445 rooms were rented at an ADR of \$288.87 by 1st October; generating \$127,855.58 in revenue. The current year's metrics showcase a r in both

Analysis

Benefits: Tangible ROI

Ok writing as i think...1. Influencing Daily avg pick up year for same day 2. Catching 40 high demand days in year due to app flag and increasing ARR by THB 200 on those days . Value of above 2 is USD 162K for year.Soft benefit: Reduced stress in knowing real time details. Stressfree is priceless
